DETAILED ACTION

1. The amendment filed August 16, 2005 is entered and claims 1-27, 29-66, 68, 69, 71-167, 169-172, and 177-180 are pending.

Response to Arguments

2. Applicant's arguments, see remarks, pages 27-29, filed August 16, 2005, with respect to the rejection(s) of claim(s) 1-27, 29-66, 68, 69, 71-167, 169-172, and 177-180 under 103 (a) rejection have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of US Patent # 5,586,787 ("Brown et al."). Brown et al. teach the visible portion of the variable indicia will not match the normally invisible photoluminescent indicia which were simultaneously printed on the original record (column 5, lines 40-43). Therefore, the rejection is maintained.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

- Claims 1-27, 29-66, 68, 69, 71-167, 169-172, and 177-180 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a

Art Unit: 2674

way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. In independent claims 1, 4, 82, and 86, the limitation "the invisible data and the visible information being printed substantially simultaneously" is not described in the specification. The applicant said that it can be found on page 26, lines 1 to 12 and the closest quote there says "the printer rasterizes and prints odd and even pages simultaneously on both sides of the sheet". The quote does not say that "the invisible data and the visible information being printed substantially simultaneously".

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
